

AGHA FASEEH AHMED KHAN

About Me

Hello! I'm Agha Faseeh, a curious and ambitious student at NED University of Engineering and Technology, pursuing Civil Engineering. With a passion for building innovative solutions, I'm actively exploring the vast possibilities within my field.

In parallel, I'm dedicated to mastering Front-end Development, focusing on comprehensive knowledge of client-side technologies. My goal is to become proficient in Front-end, then progress to Back-end and beyond, continuously pushing the boundaries of my expertise.

As a lifelong learner, I'm driven to stay updated on the latest technologies and trends. Outside of academics, I enjoy exploring new technologies and expanding my knowledge horizon.

My aspiration is to excel as a successful Civil Engineer and Front-end Developer, making meaningful contributions to both fields. I'm committed to relentless learning, growth, and self-improvement.
